FACTORY FIELD SERVICE

As quality standards increase, so does the need for high performance Sanitary Process Instrumentation. Anderson Instrument Company, a leading manufacturer of Sanitary Process Instrumentation, offers Field Service performed by our own factory trained and supported technicians.

FLOW

Sanitary Flow Metering is a critical measurement in any process, and most quality assurance programs require third party verification of instrument calibration on an annual basis. The Anderson Field Service Technicians are Sanitary Flow specialists and carry both NIST traceable positive displacement volumetric and Coriolis mass master meters. Your meter will be flow tested for accuracy while in your application to provide realistic results with minimal interruption to your process. Thorough calibration records will document the results.

Product Receiving and Load-Out for legal custody transfer, or verification is another area where Anderson specializes with the Accurate line of sanitary flowmeters. Our technicians will transport a sanitary NIST traceable prover to your facility and provide either acceptance or maintenance testing, according to Handbook 44, in cooperation with the local Weights and Measures official to certify the system for legal custody transfer.

Factory Field Service

LEVEL

Anderson technicians can install, service, and calibrate existing Anderson Tank Level Monitoring Systems and Sensors, or “wet calibrate” your tanks and create custom volumetric profiles for use with PLC integrated level gauging.

Anderson technicians are available to perform plant site surveys where they gather all required information to specify new or replacement instrumentation, or to conduct on-site product training with plant personnel.

2012 US SERVICE RATES:

In-Plant & Administrative Time: (Mon. – Fri., 7am – 6 pm)	\$135 / hr
Travel Time:	\$105 / hr
NIST Master Meter Rental:	\$105 / day
NIST Certified Prover Rental:	\$165 / day
Expenses as Incurred	
Mileage:	\$0.85 / mi
Prover Freight:	Based on location

Night and weekend work is quoted on a case-by-case basis.

Travel and Expenses will be pro-rated whenever possible.

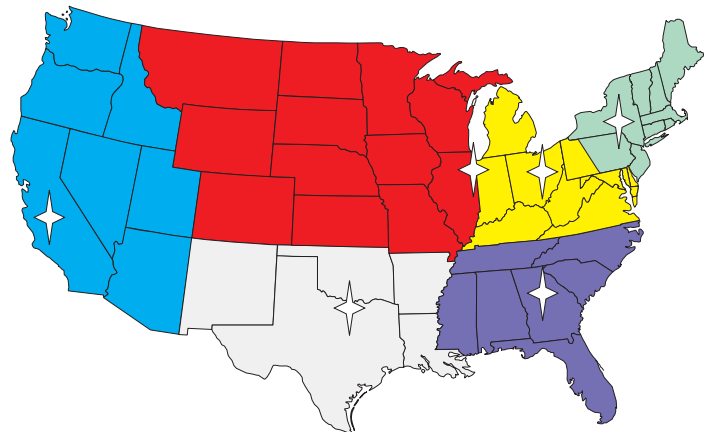

Contact your Regional Technician or your local Anderson Distributor to schedule a service appointment.

TEMPERATURE & PRESSURE

Anderson manufactures a broad line of analog and electronic temperature and pressure sensors. Ask your technician if you would like any of these instruments serviced during your plant service visit.

2012 US SERVICE REGIONS

West Coast Region:

Mark McKinney 559-331-5285
Office ext. 9262

Midwest Region:

Johnathan Brandenburg 847-778-2282
Office ext. 9263

Northeast Region:

Tim Burns 518-859-7171
Office ext. 9259

Southeast Region:

Lance Hayduk 678-799-5315
Office ext. 9260

South Central Region:

Reynaldo Arochomuniz 903-505-0075
Office ext. 9257

Mid-Atlantic Region:

Serge Batubenge 614-257-8302
Office ext. 9258
